EDUCATION

University of Toronto

Honours Bachelor of Science in Computer Science

Toronto, Ontario

Sep 2022 – April 2027

- 3.96 GPA | 4x Dean's List Scholar | USPORTS Academic All-Canadian | Varsity Blues Men's Hockey Athlete
- **Related Coursework:** Computer Security, DS & Algorithms, Databases (SQL), Operating Systems, Software Design

EXPERIENCE

Scotiabank

Cybersecurity Security Intern

Toronto, Ontario

May 2026 – Aug 2026

- Managed **150+ cybersecurity exception requests** via Jira and ServiceNow across Scotiabank and its subsidiaries, conducting risk assessments to enforce strict adherence to enterprise security governance.
- **Identified vulnerabilities** in access provisioning, collaborated with automation engineering teams to build automated data loss prevention (DLP) violation and toxic combination checks into daily request workflows.

Tangerine

DevOps Specialist Intern

Toronto, Ontario

May 2025 – Aug 2025

- Automated code deployments by building CI/CD pipelines in **Jenkins** with **Bash**, reducing manual integration branch deployments by **30%** and standardizing release consistency.
- Orchestrated **20+ Kubernetes microservices** across **5** development environments, ensuring stable deployments and handling increased traffic.

Scotiabank

Software Developer Intern

Toronto, Ontario

May 2024 – Aug 2024

- Engineered a reusable ServiceNow component for the internal development team, standardizing customer data acquisition across multiple forms to **reduce manual input by 40%** and enforce data consistency.
- Built customized front-end form experiences in JavaScript, integrating REST APIs to seamlessly trigger automated ServiceNow workflows.

Tangerine

Quality Engineering Intern

Toronto, Ontario

May 2023 – Aug 2023

- Restructured the Selenium WebDriver implementation to optimize mobile web testing execution speed by over **25%**, specifically engineered to support high-latency offshore and remote teams.
- Developed custom Java and TypeScript scripts to expand automated front-end and API test coverage by **10%**.

PROJECTS

JERC Sentry | FastAPI, Flutter, SQL, Terraform

[Documentation Site](#)

- Built an async FastAPI/WebSocket backend using Deepgram and Groq for **sub-second AI scam detection** on live Telnyx call streams.
- Developed a **Flutter app** with Firebase FCM to deliver real-time fraud alerts, featuring live intervention controls including remote call termination and network-level whisper injections.

Notion Network Syncer | Python, Docker, Kubernetes, Playwright

[Github](#)

- **Developed Dockerized Python services** to extract LinkedIn chats and meeting notes, scheduling integrations into a Notion database via Kubernetes CronJobs.
- Integrated the OpenAI API to generate structured, concise summaries of messages and notes, optimizing personal tracking and follow-up workflows.

SKILLS

Languages: Python, Java, TypeScript/JavaScript, SQL, C

Frameworks & Libraries: React/ReactNative, FastAPI, Node.js, Flutter

Infrastructure & DevOps: Docker, Kubernetes, GCP, Git, Github Actions, Jenkins

Testing & Automation: pytest, JUnit, Playwright, Jest
